

g4f: Free AI for Everyone

Made by Humans, for Humans — Open-Source Multi-Model Access, 670+ Models, Zero Cost

gpt4free.org

g4f delivers free, unrestricted AI

**Built by humans,
for humans.**

Simple, easy access via global community. Open ecosystems democratize innovation faster than closed APIs.

**670+ models.
5M downloads.**

66.5k GitHub stars prove trust. Access Opus 4.6, GPT 5.3, DeepSeek V3.2, Gemini 3 without cost.

OPEN PHILOSOPHY POWERS FREE AI

MADE BY HUMANS, FOR HUMANS

Core promise:
simple, easy, free,
unrestricted access.

xtekky (Apr 2023)  Community Stewardship  H Lohaus (Feb 2024)

GPLv3 ensures open access. Code remains open and accessible to all developers globally.

made by humans,
for humans

for simple easy and free
unrestricted access

FROM SCRIPT TO GLOBAL PLATFORM

APRIL 2023: THE SPARK

xtekky launched g4f as a simple Python script for unrestricted AI access.

FEB 2024: STEWARDSHIP

H Lohaus added multi-provider routing and lazy loading, cutting startup time to 0.4s.

“made by humans for humans”

OPEN SOURCE DEMOCRATIZES AI

MADE BY HUMANS FOR HUMANS

Built on radical
premise: simple, free,
unrestricted
access.

DeepSeek V3.2, Gemini 3, Kimi 2.5,
GLM-5.2, Grok, Mistral,
Claude 4.6

ROUTER AUTO-SELECTS BEST BACKEND

PROVIDERAUTO ROUTES DYNAMICALLY

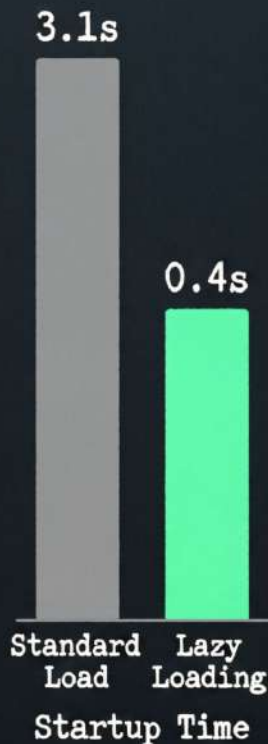

ProviderAuto evaluates backend availability for uninterrupted access across 670+ models.

LAZY LOADING CUTS LATENCY

Lazy loading cuts startup time from 3.1s to 0.4s.

SESSIONS PERSIST SECURELY

HAR and cookie persistence maintain session state.

FLEXIBLE INTEGRATION VIA PYTHON, JS, MCP

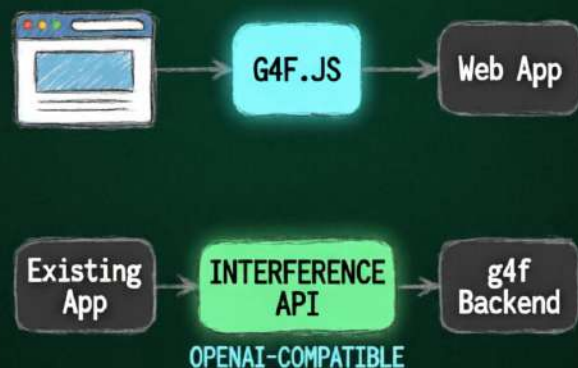

PYTHON CLIENT MODES

Supports sync, async, and streaming for flexible latency and throughput.

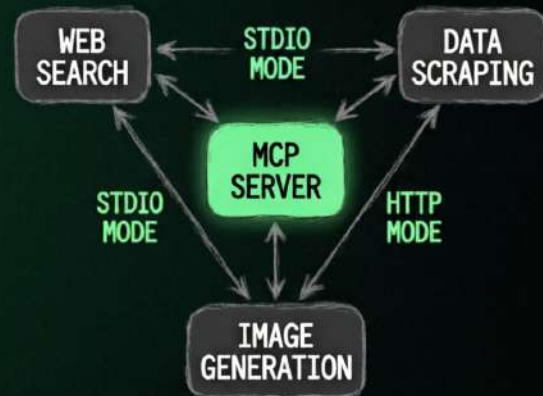

WEB AND API INTEGRATION

G4F.js runs frontend without proxy.

MCP SERVER TOOL USE

Connects assistants to web sea

OpenAI-compatible drop-in API

UNIVERSAL BACKEND

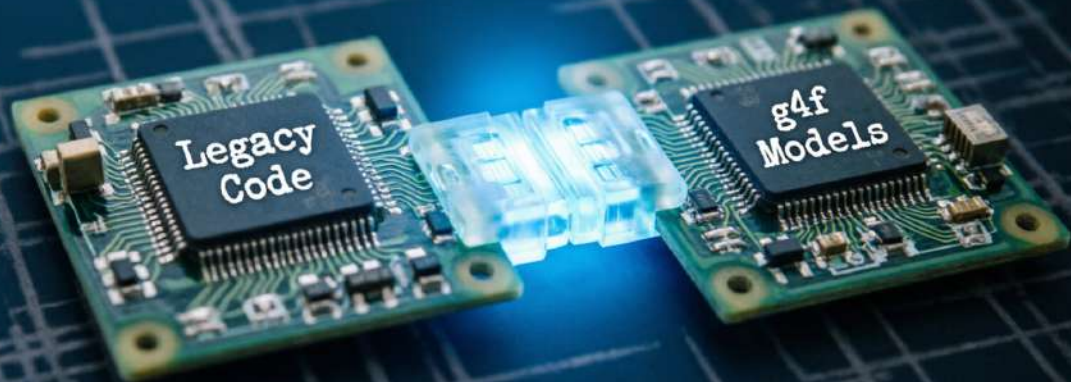

Leverage 670+ models instantly.

ZERO-REFACTOR SWITCHING

Switch endpoints without code changes. Returns identical JSON schemas.

PROVIDERAUTO ROUTING

Gateway routes to optimal backends like DeepSeek V3.2 with compatible streams.

MCP SERVER UNLOCKS WEB TOOLS

SEARCH, SCRAPE, GENERATE

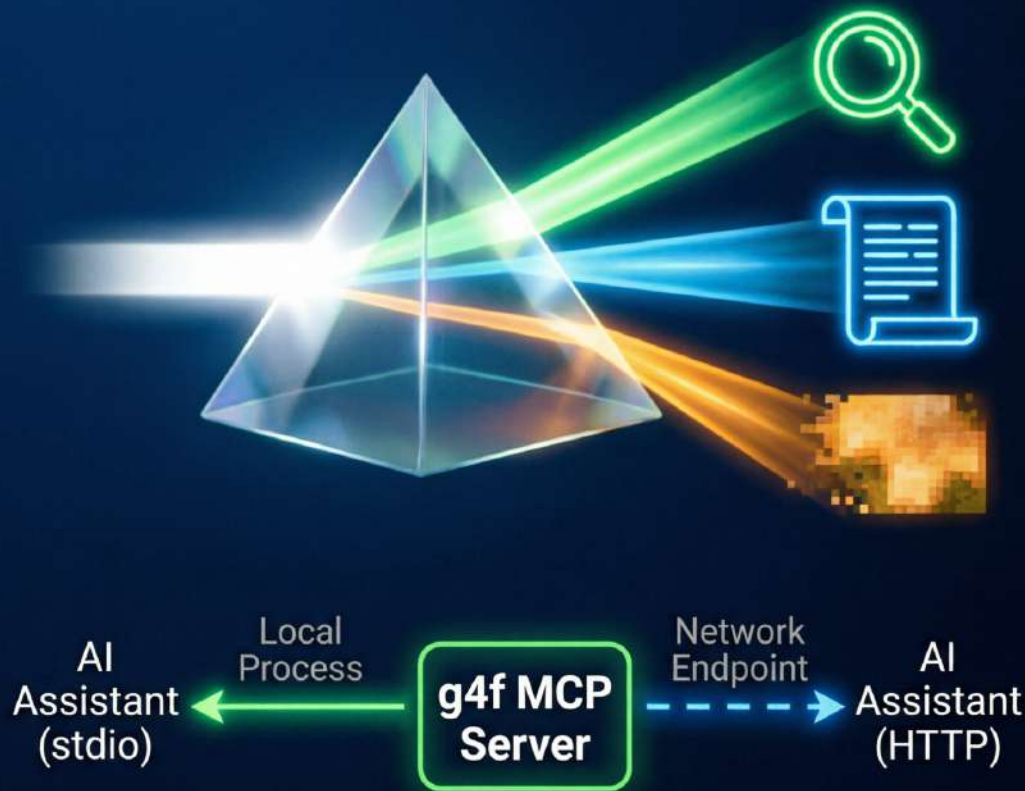

Enables real-time search, scraping, and image generation without plugins.

DUAL-MODE CONNECTIVITY

Bridges LLMs with utilities via stdio (local) and HTTP (remote).

SEAMLESS INTEGRATION

Adds web awareness or visual creativity with minim

MINIMAL CODE

Zero-cost access to 670+ models

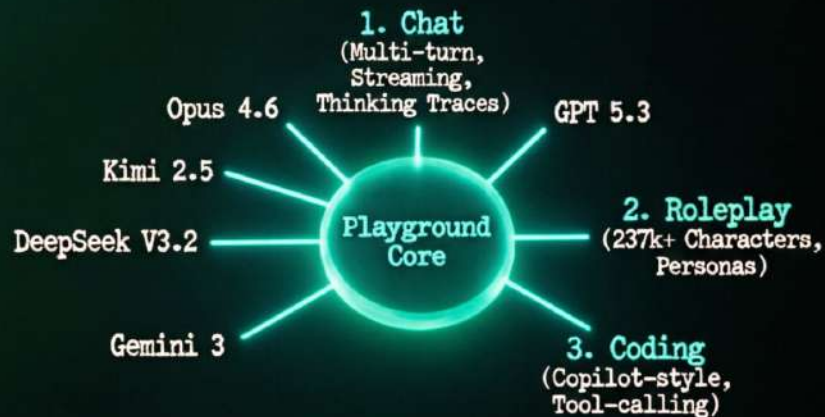

BUILT BY HUMANS, FOR HUMANS

g4f.dev Playground removes barriers, delivering free, unrestricted multi-model AI access

CHAT, ROLEPLAY, AND CODE FREELY

Multi-turn chat, roleplay with 237k+ characters

INSTANT PERFORMANCE, ZERO COST

Multi-provider routing and lazy loading cuts startup to 0.4s

Agents automate tasks; 237k+ chars enable roleplay

AUTONOMOUS PROJECT ASSISTANTS

Agents break goals into steps, invoking tools for search, code, or image gen. AI actively collaborates in a dynamic workspace.

IMMERSIVE COMMUNITY LIBRARY

Engage with 237k+ personas defined by unique traits.

ROLEPLAY MERGES PERSONAS, AVATARS & SCENES

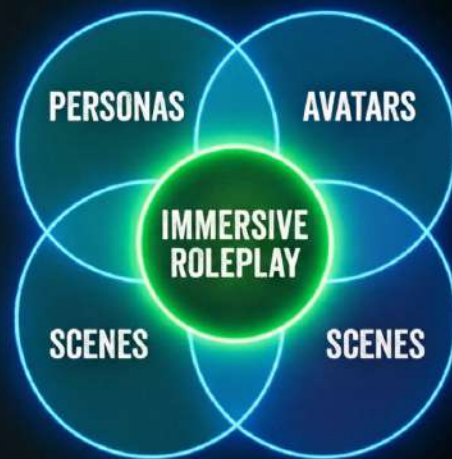

VOICE & ACCESS

Screen Reader, Speech, and Voice Assistant ensure inclusive access for all users.

SYNTHESIZE 3 LAYERS

Merges tone-defining personas, visual avatars, and dynamic scenes for immersive AI conversations.

KPI 237,000+
COMMUNITY CHARACTERS

Vast library enables instant specialized chats without prompt engineering.

App Store ships apps with zero deployment

INSTANT ACCESS

Run community tools instantly or ship custom apps in <1 min. No server setup.

SPEED METRICS

App Type	Source	Deployment Time
Community Tools	App Store Library	Instant (0s)
Custom Apps	User Upload	< 1 min
Total Available	Growing Ecosystem	N/A

MCP & SDKs

Docker, pip, and .exe ensure g4f runs everywhere

Launch native GUI on Windows desktops

Standalone .exe launcher eliminates complex terminal setup for desktop users.

Deploy scalable containers on Linux

Official Docker images abstract dependency conflicts, enabling one-command deployment.

Integrate via PyPI for Python workflows

`pip install g4f[all]` fetches v7.7.6 with all optional dependencies included.

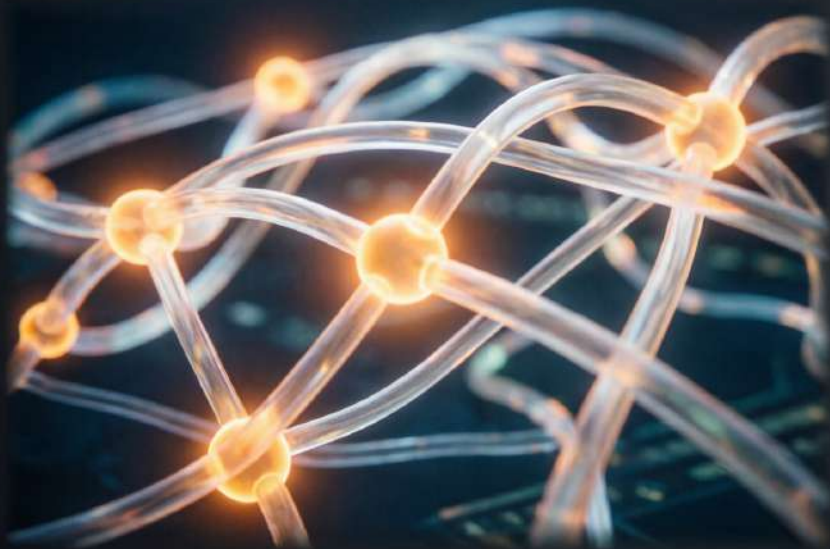

Docs and community end isolation

Live support enables collaboration

A dedicated server offers real-time peer assistance

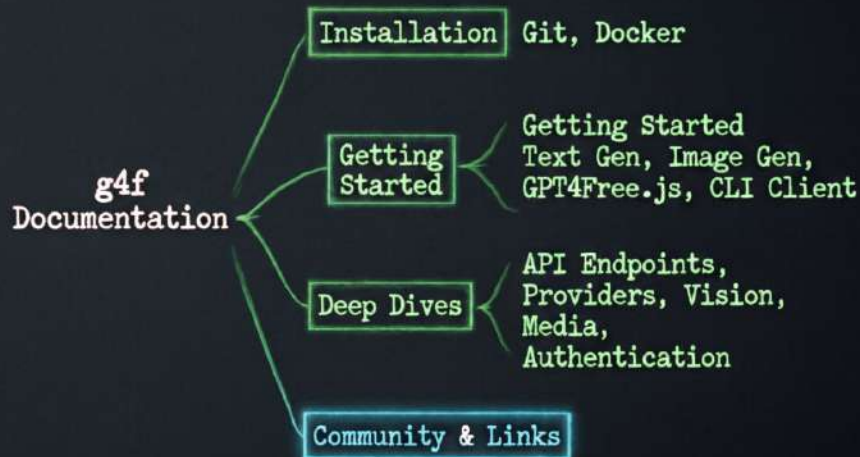

Medium Gray

Structured docs map every path

g4f Documentation Hub maps all technical details
